Opened in December 2014, Spectrum Orthopedics new medical office building and ambulatory surgery center was engineered to consolidate its numerous offices in the area. The new 44,100 square foot facility features medical offices, an MRI suite, physical therapy and occupational therapy suite, outpatient surgery center, and a radiology suite with four digital radiology rooms and four casting rooms. The building also has primary care areas with four exam pods, each of which contain eight exam rooms. Spectrum Orthopedics is now the largest orthopedic practice in Canton, Ohio.

Hilscher-Clarke performed the electrical and communications scope of work, which included the installation of the fire alarm, lighting fixtures, distribution equipment, wiring devices, and lighting controls.

Proven. Reliable. Sensible.
